Re: Transmittal of Draft Final Environmental Evaluation Working Document

Dear Randy:

Enclosed are ten copies of the Draft Final Environmental Evaluation Working Document for EG&G and DOE review. Submittal of the document is in accordance with the schedule discussed in the meeting of January 6, 1993.

The revised document addresses EG&G comments received on January 6 from Fred Harrington and Bruce Bivert. A revised Species of Concern table was obtained from EG&G and is also included.

As discussed in the meeting of January 6, Applied Environmental will proceed with the concepts presented in this Working Document, develop a Field Sampling Plan, and redraft this Working Document into a draft Environmental Evaluation Technical Memorandum. We anticipate submittal of a draft Environmental Evaluation Technical Memorandum to EG&G on February 10, 1993.

It was agreed in the meeting that a copy of the Working Document would be forwarded by EG&G and DOE to the agencies before delivery of the Technical Memorandum. Submittal of the Working Document is critical to minimizing future delays associated with the Environmental Evaluation.

Please call me or Wendy Johnson at 469-6660 if you have any questions.

Sincerely,

Applied Environmental Consulting, Inc.
